## Anti-human prion protein mab 1E2

Catalogue number Package size

0102001301 100 μg 0102001303 1 mg

For research use only.

**Product:** monoclonal antibody

Clone:1E2Host:mouseIsotype: $IgG1_k$ 

**Immunogen:** recombinant human prion protein

**Specificity:** bovine prion protein aa GSDYEDRYYR

**Purification:** purified by affinity chromatography

**Purity:** > 95% by SDS-PAGE

**Solution:** PBS pH 7.4 without additives

Storage: at -20 °C (repeated thawing and freezing should be avoided)

**Applications:** ELISA, Western Blot (see figure below)

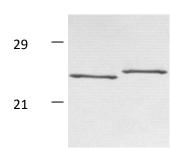

**Dilution:** 1-10 ng/ml in ELISA, 1-2 μg/ml in Western Blot

**Reactivity:** prion protein from human and cattle

## Figure MW (kDa) 1 2

Recombinant human (1) and bovine (2) prion proteins were separated by SDS-PAGE under reducing conditions and blotted on nitrocellulose membrane. NC membrane was incubated by 1  $\mu$ g/ml of mab 1E2. Bound antibody was detected using horseradish peroxidase conjugated goat anti-mouse IgG/M antibody (ZYMED) and H<sub>2</sub>O<sub>2</sub>/TMB substrate solution.

Mab 1E2 reacted specifically with both prion proteins.
